When the lights go out,

it's too late to clean
your fuel!!

FUEL TECHNOLOGIES INTERNATIONAL

IS YOUR STORED DIESEL FUEL DIRTY?

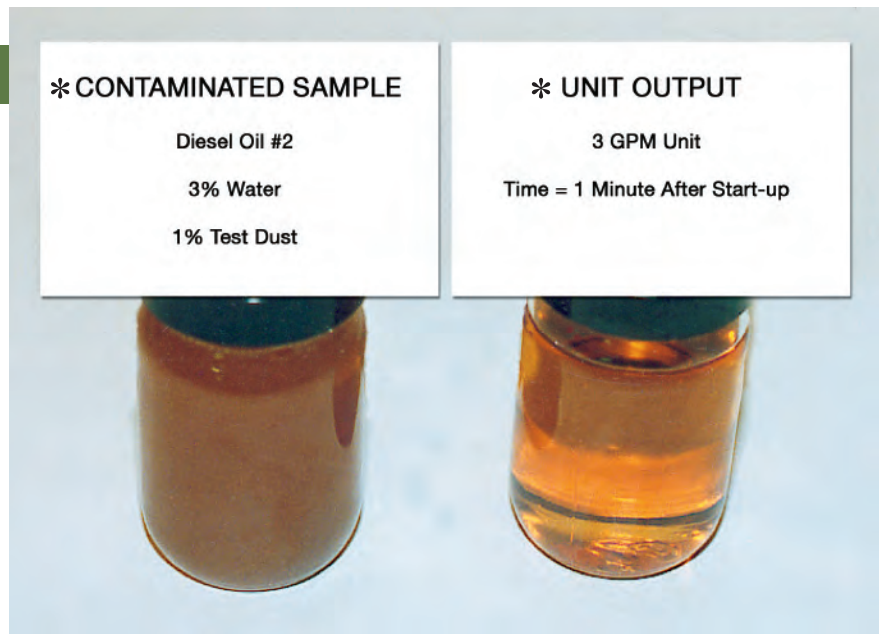

That's right, stored diesel fuel does not stay clean and safe forever. In fact, it can begin to deteriorate within 28 days of refining. Microorganisms and dirt will also contaminate your fuel over time. And bad fuel can cause generator engine damage or failure. When the power goes out and you need that back-up fuel to perform, don't get stuck with a mess on your hands. Routine emergency fuel maintenance is crucial to ensuring your backup power is ready when you need it most.

THE PROBLEM:

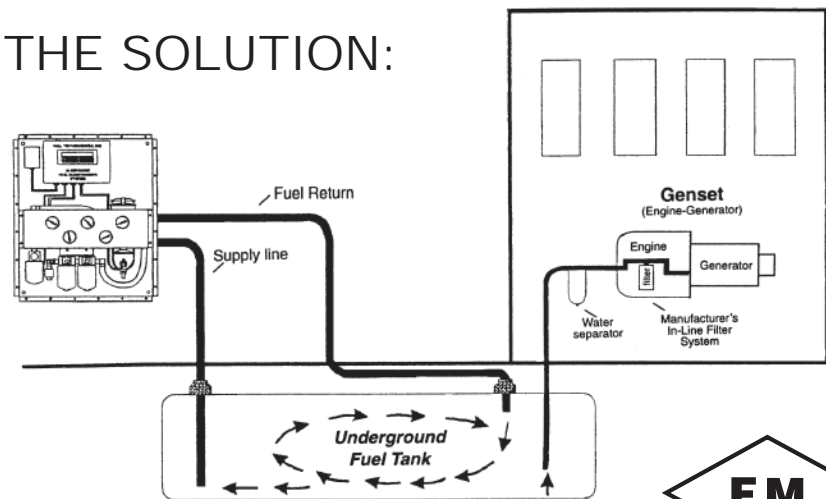

Buildup of moisture and contaminants in fuel storage tanks can dangerously clog inline engine filters, causing engine shut-down and engine damage.

THE SOLUTION:

Install an FTI Automated Diesel Fuel Maintenance System to maintain clean quality and function in your fuel. Since you can't predict an emergency, the only way to be prepared is to prevent problems.

CLEAN FUEL SAVES MONEY, TIME AND LIVES

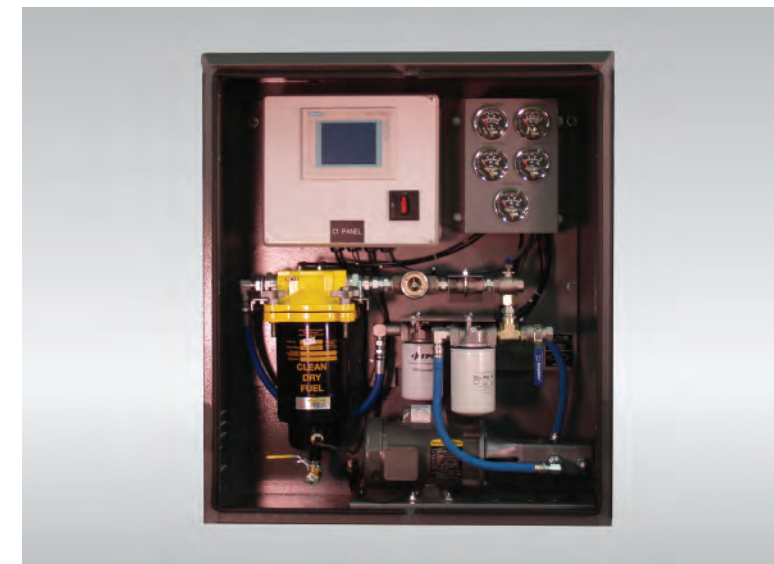

Fuel Technologies International (FTI) only manufactures automated stored diesel fuel maintenance equipment that is FM Approved and NFPA Compliant.

With the FTI maintenance systems, diesel fuel is filtered at an optimum schedule to remove near 100% of entrained water, free water and particulates.

ORDER TODAY! *When the lights go out, it's too late to clean your fuel.*

Shown Here: FTI-5A 40" x 43.25" x 14"

- Single and Multi Tank Applications
- Self Diagnosing
- Audio Alarm
- Particulate Removal Down to 1 Micron
- Near 100% Water Removal
- UL Listed Controller
- Priming Tee
- Sight Glass
- Automatic Fuel Filtration, with automatic Shut-Off & Alarms for: Water Detection, Filter Saturation, Leak Detection, and Motor Overload

- 2-door cabinet with zinc primer and powder coat finish fabricated to NEMA 3R standard
- Designed for rack or wall mount
- Available in stainless steel

Perfect for MISSION CRITICAL facilities including:

- Hospitals
- Data processing centers
- Prisons
- Banks

FTI has been known as *the* expert in diesel generator fuel maintenance since 1993.
