

## Universal Remote Display Series

PROTEUS<sup>®</sup> Mini-Me<sup>™</sup> is a universal remote display that can connect to most industry standard Automatic Tank Gauging systems. Whether you have a new site, in need of a remotely mounted display, or an existing site, where the tank gauge is located in an inaccessible location, the OMNTEC Mini-Me puts the information where you need it. The 7-inch color graphic display provides easy to understand inventory, delivery, and alarm warnings where your C operator, office manager, or delivery driver can see and react to the conditions of your fuel facility.

The Mini-Me includes a “site specific” instruction screen that pops up on the display when an alarm is acknowledged. Information where you need it and helping our customers mitigate risk were the driving factors behind this powerful device.

Mounted inside or out, wired or wireless, the Mini-Me puts the information where you need it most.

OMNTEC Mfg., Inc.
