

GOT RUSTY SUMPS?

Bacteria, Water and Acetic Acid are Corroding your STP Sumps. Protect them with our line of Lubri-Lab Rust Conversion and Passivation Products.

PROXILAB GEL can be applied directly over rust to convert the corrosion back to metal, leaving a rust-free primed surface that can be immediately painted.

RUST DEFENSE is a long lasting anti-rust clear coating that can be applied to painted and non-painted metal and will greatly lengthen the time before the rust comes back. It even works under water!
