Roth Double Wall Tanks
Double Wall Construction for Ultimate Safety & Reliability

Certified to UL SU2258 and designed to store liquids that are classified as class II or class III combustibles. Roth Double Wall Tanks are compliant with NFPA 30 & 30A, subject to building code approval by a local authority having jurisdiction.
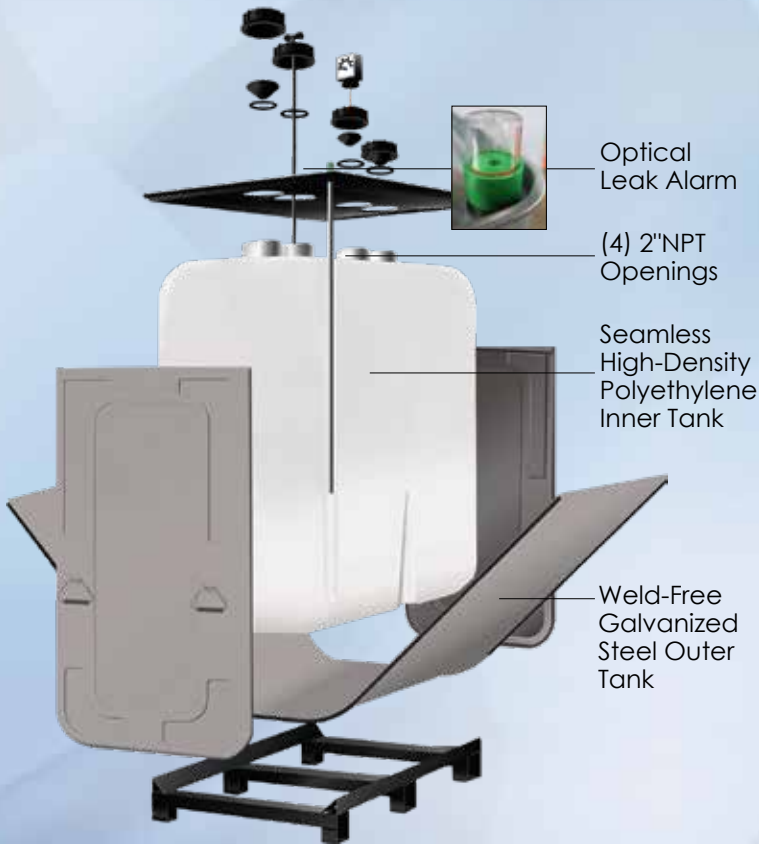

Optical Leak Alarm

(4) 2"NPT Openings

Seamless High-Density Polyethylene Inner Tank

Weld-Free Galvanized Steel Outer Tank

Construction

• The outer tank is made of leak-proof, weld-free galvanized steel and is roll-seamed with an oil and fire-resistant seal. It can contain up to 110% of the capacity of the inner tank for maximum protection.
• The inner tank is made of blow-molded, high-density, seamless polyethylene that is leak proof and will never corrode.

Double Wall Benefits

• Use for Class II and Class III fluids including: heating oil, motor and gear oil, hydraulic fluids, ATF, brake or power steering fluids, ethylene or propylene glycol based anti-freezes, diesel and bio fuels.
• Outer tank holds 110% of inner tank for maximum protection.
• Compact, economical design with (4) 2"NPT Openings (8 sq. ft for 275 gallon).
• Up to 50% lighter than a 12-gauge steel tank with larger storage capacity.
• Zero fittings below the fluid line.
• Wide handles allow easy handling.
• Leak-proof and will not corrode.

Roth Double Wall Tanks (110, 165, 275 and 400 Gallon Tanks)

Each Roth Double Wall Tank has an Optical Leak Alarm and (4) 2"NPT Openings.

Work Bench Tanks

The Ultimate Solution for Efficiently Storing and Dispensing Automotive Fluids and Lubricants in Confined Shop Applications

Conveniently Enclose 2, 3, or 4 Tote-A-Lube Tanks Contained in a Secondary Containment Vessel.

The Work Bench is complete with a 69" x 36" powder coated work surface which will remain clean and free of oil residue, as the tanks' fill ports are located below the work area. It is equipped with a universal side shelf that mounts Graco's dispense equipment, giving you the ultimate in fluid storage solutions for confined spaces.

Dispense packages and custom configurations are available upon request.

Heated Tank Blankets

Provides Even Heat for Temperature Sensitive Applications

Once Fluid Reaches the Desired Set Temperature, the Insulated Heater Blankets Maintain Temperature, Even in the Most Challenging Applications.

Features
- Constructed of 18oz NFPA Certified Flame Retardant Vinyl (Also Water, Wear and UV Resistant)
- High Efficiency Carbon Heating Grid Evenly Distributes Heat
- Heating Element Decreases Current as Temperature Increases
- Integrated GFCI is Hard Wired into Blanket
- Adjustable Retaining Straps with Quick Release Buckles for an Accurate Fit
- Fully Welded Seam Seals all Vinyl Perimeters

Industrial Ergo Handheld Sprayers

This Sprayer will work in any position, even with the tank facing up.

Industrial Ergo Sprayers are Ideal for Detailing, Cleaning & Antibacterial Disinfecting.

They are acid resistant and constructed with top-of-the-line o-rings and seals. Located on top of the pump nozzle is a storage compartment to secure extra caps and nozzles. They feature a locking trigger position, and the nozzles have smooth adjustment of the spray angle. The internal hoses are reinforced for resistance to pressure, bending, or cracking.

Color Coded Industrial Lubrication
Identify, Store & Dispense From Within Each 65 Gallon Tank

This centralized system provides storage and dispense for multiple fluids, each stored in a 65 gallon steel tank, allowing for 55 gallon drum contents to be transferred well before the existing product is gone. Eliminate the potential for mishandling with color coded fluid identification labels.

System Specifications
- Powder Coated Steel Frame
- 65 Gallon Steel Tanks with Sight Gauge
- 1-1/2HP Motor
- 5GPM Pump, 110V
- Maximum Viscosity: ISO 460
- Polyurethane Shut-Off Valves
- Self Closing 1" Bronze Dispense Valve
- Optional Filtration
- Optional Spill Containment
- Multiple Dispense Packages Available

Stackable Tank Gravity Feed Assembly Instructions

Tools Needed:
- Flat-head Screwdriver
- Pipe Wrench
- 9/16" Wrench

Components:
- (2) Tanks
- Steel Stand
- Drip Tray Assembly
- Gravity Feed Kit (GFKIT2)

Step 1
Tip or invert stand on concrete base with elbow mount holes to front. Hand tighten 4 legs into couplings, then torque 1/2 to 1 full turn with pipe wrench. The stand can be levelled by adjusting leg heights.

Step 2
Before setting stand right side up, slide drip tray frame down front legs: tighten set screw to hold in place. Place in prepared location, (containment vessel). Adjust drip tray to desired height; tighten. Insert drip trays in frame.

Step 3
Stack one tank on top of assembled stand with bulkhead and fill port facing outward. Align front of tank with front edge of stand (front edge has pre-drilled holes). Stack & interlock each additional tanks, using top and bottom molded groves.

Step 4
Bolt elbow(s) to the stand's pre-drilled holes.

NOTE: If assembling a Wall-Stacker System, place the wall straps over the top and front of the tank(s). Bolt to bottom of the wall straps to the tank's stand prior to bolting the elbow into place. The top of the wall straps can later be bolted to the wall once the entire system is assembled and positioned in place.

Step 5 IMPORTANT: DO NOT OVERTIGHTEN. Maximum Torque 60 ft. lbs. Hand tighten only.
Apply thread sealant to:
A) Dispense valve (FOR BOTTOM TANK). Hand tighten into bottom tank bulkhead.
B) Dispense valve (FOR STACKED TANKS). Hand tighten into front of elbows on stand.

Step 6
Apply thread sealant to 90° barb. Hand tighten into stacked top tanks bulkhead fitting (not bottom tank). Torque until facing five o'clock position.

Step 7
Cut tubing to length, if needed. Place a clamp on each end. Using a screwdriver, secure tubing onto upper tank's 90° barb and the other end onto stud barb.

Remote Fill Kit (RFKIT) Assembly

Tools Needed: Flat-head Screwdriver, 9/16" Wrench
Steps 1-5
Before stacking the upper most poly tank on the system:

Steps 6-7
Complete the Remote Fill Assembly

Step 1
Remove the 2" metal cap from the top of the tank and in its place thread in the included 'blue' Vacuum Breaker.

Step 2
Remove the 2" plastic cap from the top tank's angled fill port and in its place thread the 2" 90° 'black' elbow. Orientate the elbow to face towards the side of the tank.

Step 3
Apply sealant to the 1-1/2" 90° 'black' barbed elbow and thread it into the 2" elbow threaded in the previous step. Orientate the elbow so the barbed end points to the bottom of the tank.

Step 4
Slide one end of the hose over the barbed end of the elbow; secure with hose clamp.

Step 5
Stack the tank at the top of the system and complete the Gravity Feed Assembly Instructions. (Left).

Step 6
Attach the main RFKIT preassembled component (ball valve, hose barb, elbow, and quick connect) to the leg of the stand using the included u-bolts, washers, and nuts.

Step 7
Slide the end of the hose over the barbed end of RFKIT preassembled component and secure with a hose clamp.

Fluidall, LLC Exclusive Manufacturer's Limited Lifetime Tank Warranty

As a result of our superior quality control standards, Fluidall has the confidence to stand behind our rotationally molded storage tanks with a Manufacturer's Limited Lifetime Warranty.

1. **Limited Warranty.** Fluidall, LLC ("Fluidall") warrants to the original customer that our rotationally molded storage tanks (the "Tanks") will be free from defects in workmanship and materials, under normal use and service, for the serviceable lifetime of the tank starting on the date of shipment from our factory. Fluidall's SOLE OBLIGATION and customer's SOLE REMEDY in the event of a defect covered by this warranty will be, at Fluidall's option, to (a) replace or repair the defective Tank, or (b) refund to customer the purchase price paid by customer for such defective Tank.

2. **Suspension of Warranty**. Should the customer not pay for a Tank in full as due, Fluidall's warranty shall be deemed suspended until such time as Fluidall receives payment in full for such Tank.

3. **Obvious Defects**. The carrier and Fluidall must be notified in writing of any and all damage that is discoverable upon a visual inspection of the Tank when it is received and any missing parts or accessories within seventy two (72) hours of receipt of Tank. Any and all such omissions or damage must be noted on the Bill of Lading.

4. **Installation**. Customer's installation and use of the Tank must comply with all applicable federal, state, and local regulations, and must be in accordance with applicable instructions and limitations contained in Fluidall's Usage and Handling guidelines for the Tank and Fluidall's chemical specific recommendations. Normal maintenance and repair shall be performed by the customer. By accepting delivery of the Tank, the customer accepts full responsibility for providing secondary containment appropriate and adequate for the stored material.

5. **Warranty Procedure**. In order for the Lifetime Limited Warranty to apply, Fluidall must be notified in writing of any alleged defect or fault discovered by the customer within seven (7) days of its occurrence and Fluidall must be given the opportunity to inspect the alleged defective Tank within thirty (30) days of such notification. Fluidall may require the return of the alleged defective Tank to establish the claim. Upon Fluidall's written authority, customer shall return the alleged defective Tank (or portion of the alleged defective product as instructed by Fluidall) to Fluidall for inspection, freight and insurance prepaid by customer. ANY UNAUTHORIZED SHIPMENT OR SHIPMENT CONTRARY TO FLUIDALL'S INSTRUCTIONS WILL VOID THIS LIFETIME LIMITED WARRANTY. Final disposition of any warranty claim will be solely determined by Fluidall. Any attempted repair of a Tank by customer without Fluidall's express, prior written consent WILL VOID THIS LIFETIME LIMITED WARRANTY.

6. **Warranty Exclusions**. THIS WARRANTY SHALL NOT APPLY TO any Tank that after leaving our factory.
   (a) Has been repaired or altered in any manner not authorized in writing by Fluidall.
   (b) Has been damaged in transit or has been subject to abuse, misuse, fire, accident, improper or careless handling or neglect.
   (c) Has not been used in accordance with Fluidall's chemical resistance recommendations.
   (d) Has not been serviced and maintained as in accordance with the written instructions provided by Fluidall.
   (e) Has been exposed to pressures greater than atmospheric pressure.
   (f) Has been exposed to internal or external temperatures greater than 120° F.
   (g) Has been connected, installed, adjusted or used other than in accordance with the written instructions provided by Fluidall.

7. **Warranty Disclaimers**. THIS LIFETIME LIMITED WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES AND GUARANTEES, WHETHER EXPRESSED OR IMPLIED, INCLUDING STATUTORY WARRANTIES, SUCH AS WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND/OR NON-INFRINGEMENT AND INCLUDING ANY WARRANTIES ARISING FROM COURSE OF DEALING, USAGE OF TRADE OR OTHERWISE.

8. **Limited Remedies**. Fluidall's sole liability and the original customers' sole remedy for breach of warranty shall be limited to the remedies provided in Paragraph 1 above. UNDER NO CIRCUMSTANCES SHALL FLUIDALL BE LIABLE TO CUSTOMER OR ANY PERSON CLAIMING THROUGH CUSTOMER FOR SPECIAL, INDIRECT, INCIDENTAL, PUNITIVE OR CONSEQUENTIAL DAMAGERS OF ANY DESCRIPTION WHETHER ARISING OUT OF WARRANTY (INCLUDING, WITHOUT LIMITATION, LIMITED WARRANTIES) OR ANY OTHER CONTRACT, NEGLIGENCE OR OTHER TORT OR OTHERWISE. Fluidall also disclaims all liability, whether in contract, tort, warranty or otherwise, to any party other than the original customer.

9. **Entire Warranty**. This warranty constitutes the full understanding between Fluidall and the original customer regarding the Tanks, and no terms, conditions, understandings, or agreements purporting to modify or vary the terms of this Warranty shall be effective unless made in writing and signed by an authorized representative of Fluidall.

10. **Limitation of Liability**. In no event shall Fluidall's liability on any claim for damages arising from or connected with the sale, manufacture, delivery or use of the Tanks exceed the purchase price of the Tank. All legal actions for breach of this lifetime limited warranty must be commenced on or before the expiration of one year from the date of such breach. Otherwise, such action shall be considered barred by a period of limitations established by agreement.
