EV Charging Offering

Products:

48A (11.5kW), 80A (19.5kW) Level 2 Commercial Chargers

48A chargers offer a 51% faster charge than what most locations have currently installed.

Mounting Configurations:

Wall Mount, Stand Mount, Pedestal

* Cable retractors available for wall mount and pedestal

Driver payment options:

Red E App, QR code, RFID card, CC reader (pedestal only)

Ability to offer free charging to guests via RFID cards or Red E App permissions, while still charging public drivers separate rates.

Charge drivers by \$/kWh, \$/hr, flat rate (ie \$10)

HIGHLIGHTS

- Sleek, robust, weatherproof design
- Custom branding available (custom pedestals and faceplates)
- Cable retractors help with longevity and tidiness in high traffic areas
- Easy to use dashboard to track charger usage and set permissions
- Capture additional revenue through charger usage
- Only EV charger with integrated pay for parking system
- Dynamic load sharing = more chargers needing less power
- Attract guests by offering this amenity
- Offer charging as a perk to VIP guests
- Industry leading software and access fees
- Accepted by all utility rebate/incentive programs if available
- Visibility as an EV friendly destination by being present on all available apps, maps, and in car navigation systems (Plugshare, Google Maps, Ford, etc)
