

V THE RED E DIFFERENCE

> COMPETITIVE PRICING

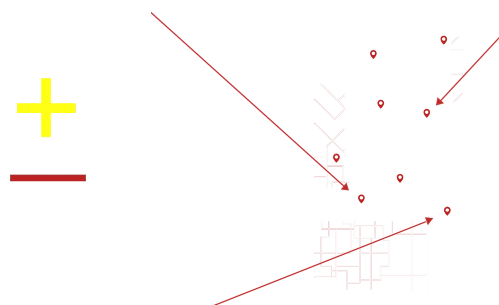

As one of the nation's largest EV charging distributors, we pass the savings of our scale on to you.

> SMART SITE SELECTION

Our proprietary algorithm helps us accurately predict usage at your location, while also identifying any available incentives to ensure you're deploying assets where they are needed most.

> ROI FOCUSED

No two sites are the same. With our usage predictions, we are able to customize the solution at each site to maximize ROI.

> ALIGNED INCENTIVES

Our services include 24/7 in-house driver support, site specific marketing, and around-the-clock charger monitoring to ensure charger reliability and maximize the driver's experience.

RED E WAS BUILT BY EV DRIVERS FOR EV DRIVERS WITH THE AIM OF MAKING CHARGING AS FAST, EASY, AND TRANSPARENT AS POSSIBLE

> EASY TO USE

Our chargers never require apps, memberships, or RFID cards. Drivers of any vehicle can simply scan the QR code/swipe their credit card, and charge.

> REVENUE WITHOUT THE RESOURCES

With over 1,000+ projects completed, we leverage our expertise to ensure your chargers are online, operational, and profitable so you can focus your resources on your core business.

> TURNKEY SOLUTIONS

Red E will deliver the ease of a full turnkey program, including acquiring incentives, site design, charger installation, and post-deployment maintenance to make the project a success throughout our partnership.

> FUTURE PROOF

We only deploy the latest available, scalable technology. With chargers ranging from 12 - 480kW we make sure your site is ready to grow as demand does.

SITE HOST DETAILS

— TURN KEY

+ FAST CHARGING

— SITE SELECTION

- > We leverage our extensive experience and work with our hosts to find the best site to maximize usage and impact while minimizing disruption and cost.

PERMITTING

- > We handle all aspects of the paperwork needed to get your site on line including permitting, new address applications, and inspections.

MAKE READY

- > Our project managers work directly with your local utility provider to ensure adequate power is supplied and installed to power the charging stations.

INSTALLATION

- > Our team of master electricians and construction crew will professionally install all charging equipment, signage, and bollards at no cost to the our hosts.

OPERATIONS

- > We provide monthly usage reports so you can see how the chargers are being used. We also handle all billing including costs of electricity, insurance, and connectivity.

REVENUE

- > At the end of each month our site hosts will receive a revenue share directly deposited to their bank account.

MAINTENANCE

- > We receive real time notifications of any issues with our equipment. As certified maintenance partners for all hardware we use, we will handle any maintenance issues within 72hrs ensure a 97% up time all at no cost to our site hosts.
