

How much fuel are you giving away?

Inaccurate meters in your dispensers result in the loss of thousands of dollars even when the meters are within agency accepted tolerance levels. With the price of fuel well over \$3.00 per gallon, you run the risk of losing almost seven hundred dollars per month, per cubic inch of calibration error.

Below is a simple calculation that shows your lost revenue:

Fuel:	\$3.00 per gallon
One cubic inch of fuel:	1.4 cents
Sell 250,000 gallons per month:	\$695.00 monthly loss
Approximate Annual Loss:	\$8340.00

Make sure your meters are accurate, every inch counts!

Schedule a Meter Calibration with our Service Department today

SPECIALS - *Prices Reduced – Limited Quantities*

Piusi EX50 Basic Fuel Transfer Pump Kit

From tractors to small fleets, the Piusi EX50 has the power to get the job done quickly and efficiently. This kit includes a 15 GPM fuel pump, auto-nozzle, anti-kink delivery hose, downtube, flanged tank connector and a K33 mechanical flow meter.

Designed to dispense gasoline, diesel and kerosene.
